

Special Issue

Molecular Genetics, Genomics and Breeding for Improved Fruit Quality and Biotic Stress Resistance

Message from the Guest Editors

Biotic stresses are a major cause of losses in agriculture, and climate change is one factor exacerbating their threat. Moreover, the market is demanding fruit with better quality in its broadest sense of nutritional, sensorial, and technological quality. In this scenario, plant breeding is expected to play a central role, with a clear need for innovative approaches that can accelerate the rate of genetic improvement required to sustainably meet an unprecedented demand for high-quality food. For this Special Issue, we encourage the submission of original research articles or comprehensive reviews relating to different aspects of fruit quality and/or pest and disease resistance improvement by means of conventional and advanced breeding approaches, including omics-assisted breeding and new breeding technologies.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
