

Special Issue

Functional Genomics Research of Crops

Message from the Guest Editors

Functional genomics has become fundamental in biological research. In a broad sense, it is a very extensive research area including from genome functional annotation to metabolome passing through to gene expression regulation. The objective of this Special Issue is to present to the international research community a wide perspective about functional genomics in crops (including herbaceous and tree species). Submissions on the main topics are invited, but not excluding other related topics: (1) Omics works in transcriptomics, proteomics and metabolomics but even in epigenomics and epitranscriptomics; (2) Gene expression regulation, including transcription but also translation; (3) Protein–protein and protein–nucleic acid interactions; (4) Mutagenesis and gene edition (RNAi, CRISPR, etc.); (5) Bioinformatic tools for functional genomics including genome annotation, direct RNA sequencing, etc.; (6) Any work on functional genomics in crops.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
