

Special Issue

Analysis of the Genetic Diversity of Crops and Associated Microbiota

Message from the Guest Editors

This Special Issue of *Agronomy*, dedicated to the analysis of the genetic diversity of crops and associated microbiota (Rhizobia, Mycorrhiza, and Plant Growth-Promoting Rhizobacteria) is aimed at publishing original research or review papers dedicated to the study of the diversity of crop genetic resources and genetics of cultivated plant species, and also, to the study of its associated microbiota, considering Nitrogen-fixing bacteria, mycorrhizae, and growth-promoting bacteria. Other aspects related to the analysis of crop genetic and germplasm diversity will also be welcome in this volume.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
