## Genetic Improvement of Soybean Nutrient Use Efficiency

### Message from the Guest Editors

Soybean is an important legume crop that provides large amounts of proteins and oils for both human and livestock in the world. Meanwhile, soybean, distinct from other staple crops, acts as an environmentally friendly type of crop in sustainable agricultural systems because it may obtain N primarily from the atmosphere through symbiotic N2 fixation (SNF) in coordination with rhizobia. In recent decades, excessive fertilizer application and low fertilizer utilization efficiency have not only resulted in a series of environmental problems such as eutrophication but also led to the waste of natural phosphate rock resources. It is necessary to develop crop cultivars with high fertilizer utilization efficiency in order to maintain sustainable agriculture production. Therefore, in this Special Issue, we aim to publish recent research advances in genetic improvement in nutrient use efficiency of soybean, including essential and beneficial nutrients.

# About the Journal

## Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Editor-in-Chief

Prof. Dr. Leslie A. Weston Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
