

## Special Issue

# Grass Improvement through Integrated Omics, Physiology and Breeding Approaches

### Message from the Guest Editors

The availability of plant multi-omics has given scientists a qualitative leap in their understanding of plant growth and development and the laws of adversity. These accumulating omics data when integrated with plant phenotypic and physiological analysis and/or conventional/molecular breeding strategies enable us to explore the regulation mechanism; excavate key genes related to yield, quality, disease resistance, stress resistance, etc.; and to advance breeding of grass species. This Special Issue aims to provide a set of papers which illustrate our current progress in integrated approaches of plant omics, plant stress tolerance and yield-related gene mining, plant physiology, and breeding strategies toward grass improvement. Review articles, research articles, and short communications fell into the above-mentioned field are also encouraged.

---

### Guest Editors

Prof. Dr. Bin Xu

College of Agro-Grassland Science, Nanjing Agricultural University, Nanjing 210095, China

Prof. Dr. Linkai Huang

Department of Forage Science, College of Grassland Science and Technology, Sichuan Agricultural University, Chengdu 611130, China

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
