

## Special Issue

# Advance in Grassland Productivity and Sustainability

### Message from the Guest Editor

Grassland is an important ecosystem that cover approximately 40% of the global land surface and 70% of agricultural area. It produces about 10% of terrestrial plant biomass and 20–30% of soil organic carbon (SOC). Grassland delivers vital multiple ecosystem services, including food production, biodiversity, climate regulation, water quality, mediation of water flows, erosion control and landscape, and recreation. However, grassland is threatened by many factors, such as overgrazing, drought, and unsustainable agricultural practices. Increasing grassland productivity and sustainability require a more widespread application of efficient and cost-effective management and policies. Strategies to improve grassland productivity such as optimizing N fertilizer rates, stocking rate, legume and supplements, grazing management, manipulation of daily herbage allowance, mitigation of greenhouse gas emissions, carbon sequestration, and improving biodiversity and proper use of grass by-products.

### Guest Editor

Dr. Mohamed Abdalla

Institute of Biological and Environmental Sciences, School of Biological Sciences, University of Aberdeen, 23 St. Machar Drive, Aberdeen AB24 3UU, UK

### Deadline for manuscript submissions

closed (30 April 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

---

### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,  
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
