Metabolomic and Transcriptomic Response of Plants to Beneficial Microbes

Message from the Guest Editors

The field of plant–microbe interactions has been the focus of extensive research for decades, leading to discoveries that allow the use of beneficial microbes as plant probiotics and as biocontrol agents. Despite this, many of the positive responses of the plant to these microorganisms remain undescribed. Now, the emergence and development of metabolomic and transcriptomic (RNA-Seq) methodologies enables us to almost fully understand these responses. Here, we present a new Special Issue (SI) for *Agronomy*, entitled “Metabolomic and Transcriptomic Response of Plants to Beneficial Microbes”. With this SI, we aim to gather knowledge regarding the molecular mechanisms triggered in those interactions involving plants and beneficial microbes. The transcriptomic and metabolomic information obtained from plant–microbe interaction will provide new insights to develop strategies to improve crop productivity and resilience to biotic and abiotic stresses.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
