

Special Issue

Nitrogen Cycle in Farming Systems

Message from the Guest Editors

The aim of this Special Issue is to present the newest solutions in nitrogen management in diverse farming systems, subsequently leading to fulfilling twin objectives of the sustainable intensification of agriculture, i.e., food production, using efficiently non-renewable resources, without disturbance of the environment. Scope including: 1) Nitrogen budgeting and cycle in farming systems in different climatic zones (tropic; humid; dry) 2) Nitrogen budgeting and cycle in diverse farming systems (crop farming systems; mixed crop–livestock systems; extensive farming systems; industrialized farming—plantation) 3) Effect of organic and mineral N carriers on activity of soil microorganisms; structure and transformation pathways of soil N compounds; soil N compounds as indicators of N availability to crop plants 4) In-season nitrogen balance in fields with diverse cropping composition 5) Critical stages of the crop plant's requirements for nitrogen 6) A comparison of bio-fertilizers with mineral N carriers 7) Effect of a synchrony of the simultaneous application of organic fertilizers with mineral N fertilizers on N efficiency

Guest Editors

Prof. Dr. Witold Grzebisz

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
