

Special Issue

Recent Advances in Horticultural Crops-from Omics to Biotechnology

Message from the Guest Editors

This Special Issue will present a broad range of innovative approaches used to address the following topics in horticultural plants, which are of broad international and disciplinary interest:

- all type of omics, including genomics, transcriptomics, proteomics, and metabolomics;
- genetic engineering and genome editing;
- organ formation and development and their genetic basis;
- genetic analysis of tolerance or resistance;
- genome biology and evolution;
- genetic basis of quality and production;
- stable and transient transformation technology

Guest Editors

Prof. Dr. Lijun Ou

Dr. Guanglong Wang

Prof. Dr. Ai-Sheng Xiong

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
