Special Issue

Breeding for Organic Nutrition of Vegetable Crops

Message from the Guest Editor

The purpose of this Special Issue is to publish good-quality research articles addressing recent developments in vegetable crop breeding for efficient organic nutrition and high productivity. This Special Issue aims to provide contributions from a variety of current and relevant topics in the horticultural sciences; vegetable crop breeding; vegetable crop production and management; plant physiology, nutrition, and biochemistry; soil chemistry and microbiology; organic crop production; and compost and waste management

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
