

Special Issue

Micronutrient Homeostasis and Biofortification in Plants

Message from the Guest Editors

We believe that continued communication on this topic amongst plant scientists is critical to improve our understanding of how plants sense and deal with micronutrient fluctuations, and to further use this knowledge in genetic improvement. The purpose of this Special Issue is to publish high-quality research articles addressing recent developments in the fields of plant ionomics, micronutrient homeostasis (uptake, transport, partitioning, accumulation, remobilization), and biofortification. We invite researchers from around the world at the frontiers of these fields to contribute their innovative research findings to this collection, including original research articles, review articles, and short communications.

Guest Editors

Prof. Dr. Raul Antonio Sperotto

Life Sciences Area, Graduate Program in Biotechnology, University of Taquari Valley - Univates, Lajeado, RS, Brazil

Prof. Dr. Felipe Klein Ricachenevsky

Botany Department, Institute of Biosciences; Graduate Program in Cellular and Molecular Biology, Center for Biotechnology; Federal University of Rio Grande do Sul, Porto Alegre, Brazil.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
