

## Special Issue

# Plant Interference through Competition and Allelopathy

### Message from the Guest Editors

This special issue will focus on competition and allelopathic interference mechanisms in aquatic and terrestrial plants, and their impact on plant growth, invasion, community diversity and ecosystem function. Of particular interest in this issue is the focus on new technologies to study the impact of allelochemicals on ecosystem and rhizosphere diversity as well as the role of microorganisms in allelopathy, allelochemical production and transformation and plant interference. In addition, novel techniques employing modelling of plant and weed growth and development, as well as above-ground crop canopy traits and below-ground root architecture, can be employed to predict how and when plants are most competitive in terms of resource allocation.

### Guest Editors

Dr. Jeffrey Weidenhamer

Dr. Sajid Latif

Prof. Dr. Leslie A. Weston

### Deadline for manuscript submissions

closed (10 December 2021)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
