

Special Issue

Recycling Agricultural, Industrial, and Municipal Byproducts While Enhancing Agricultural Production and Protecting the Environment – Volume I

Message from the Guest Editors

This Special Issue aims to bring together research on critical aspects of emerging technologies and practices to enhance soil productivity and reduce environmental and human health risks that may arise from the utilization and recycling of agricultural, industrial, and municipal byproducts. More specific topics covered in this Special Issue include, but are not limited to, the following:

Use of agricultural, industrial, and municipal byproducts as soil amendments, fertilizer sources, or environmental sorbents, such as manure solids, municipal bio-solids, compost, biochar/hydrochar, etc.;

Mitigation of pesticides, microplastics, pharmaceutical active compounds, and heavy metal contamination in soils.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
