

Special Issue

Sustainable Agronomical Practices for Saving Water Supply

Message from the Guest Editors

Climate change threatens to increase food insecurity and exacerbate water scarcity in arid and semi-arid regions, which are home to some of the poorest waters in the world. Essentially, the effects of this change will appear on the water sector in the form of low water quantity and will cause an increase in crop demand for water, an increase in dryland, and a loss of biodiversity. In the context of water conservation in the agricultural sector, a set of integrated interventions from sustainable agronomical practices, such as regulated deficit irrigation, minimum tillage, biostimulants, and organic amendments, are required in order to save water and enhance efficiency and productivity of agricultural water use. In this Special Issue, we aim to focus on new and smart approaches to increase efficient water-saving systems for crops, as well as on strategies for enhancing water productivity and to reduce water consumption.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
