

Special Issue

Soil Microbiome and Agriculture Management

Message from the Guest Editor

Microbiome is the most active component of soil. Yield, health and nutrient use efficiency of crop, soil nutrient cycling, greenhouse gases emission, and carbon sequestration are all closely related to soil microbiome. Therefore, microbiome is among the hottest research topics in the field of modern agriculture. In this Special Issue, papers on any research area relating to microbiome in agricultural ecosystems, or the effects of soil microbiome on and response of soil microbiome to agriculture management are welcome.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
