

Special Issue

Effects of Soil Organic Carbon on Agricultural and Environmental Functions

Message from the Guest Editor

This Special Issue will focus on Soil Organic Carbon and its influence on agricultural and environmental effects. We welcome novel research, reviews and opinion pieces addressing the relationship between SOC content/balance and soil functions, investigating a broad range of agronomic and ecosystem aspects. Related topics include soil biogeochemistry, hydrology, microbiology, agronomical field studies and modelling.

Guest Editor

Dr. Emanuele Lugato

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
