

## Special Issue

# Soil Degradation, Restoration and Management: Current Status and Future Challenges

### Message from the Guest Editors

In this Special Issue, we welcome contributions covering inter- and transdisciplinary research on soil degradation, conservation, and restoration in the context of a changing global environment through observational, theoretical, and applied studies. Topics of interest include but are not limited to 1) soil degradation by unsustainable land use and inappropriate land management practices, and 2) soil conservation measurements and restoration actions for maintaining ecosystem services and functions (including research, management, education, and policy).

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.
