

Special Issue

Sustainable Development of Farming and Nutritional Behaviours – Aspects of Economics and Management

Message from the Guest Editors

This Special Issue aims to answer the question about the scope and conditions for the implementation of the concept of sustainable development in the sphere of agriculture, agricultural product distribution, and food consumption. Reduction of the knowledge gap in the scope of the presented issues will be supported by studies on the directions of agricultural development, as well as the strategies and marketing activities of food producers and distributors. Striving for a holistic presentation of the issues raised, articles whose authors also indicate the typologies of consumers of agri-food products and their attitudes towards sustainable development will be very desirable. It would be valuable to look at this issue from the perspective of individual types of agricultural products and the experiences of various countries.

Guest Editors

Prof. Dr. Magdalena Sobocińska

Prof. Dr. Dżamília Skripnuk

Prof. Dr. Grzegorz Maciejewski

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief
