## Special Issue

# Pests, Pesticides and Food Safety in a Changing Climate

#### Message from the Guest Editor

Our special issue "Pest, Pesticides and food security in changing climate" aims to gather research outlining the actual and potential impacts of changing climates in management of pests and their ultimate impacts in agronomic production systems. Some of the major aspects of this topic may include but are not limited to:

- Effect of climate change elements on pests (insect, pathogen and weeds) infestation, tolerance, invasiveness and control
- Effect of changes in agronomic management and production systems or pest management practices on the above-mentioned aspects of pests' biology and management.
- Future trends of pesticides use and their residual effects under predicted climate changes

### **About the Journal**

#### Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

#### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
