

## Special Issue

# Multimodal Artificial Intelligence in Healthcare

### Message from the Guest Editors

Artificial Intelligence is rapidly transforming healthcare. AI has applications in disease diagnosis, prognosis, and healthcare data analytics. AI can aid physicians and doctors through efficient workload management and in reducing data analysis time. AI can make better-informed decisions through incorporating multimodal healthcare data. However, the majority of AI methods rely on use of single-modality data. Many recent studies have demonstrated that the use of multimodal data tends to enhance the predictive performance of AI models in medical imaging. Hence, multimodal AI models, along with early/late data/inference fusion approaches, can utilize complex features from data efficiently, thus resulting in better decisions. This Special Issue aims to cover recent advancements in multimodal AI for healthcare applications. Its focus is on new methods and applications of AI in healthcare that incorporate multiple modalities of data such as images, text, electronic healthcare records, etc. This research topic will benefit both the AI and clinical researchers looking for new developments in multimodal AI methods in the medical data domain.

---

### Guest Editors

Dr. Hazrat Ali

Division of Computer Science and Mathematics, University of Stirling,  
Stirling FK9 4LA, UK

Dr. Kashif Ahmad

Department of Computer Science, Munster Technological University  
Cork, T12 P928 Cork, Ireland

---

### Deadline for manuscript submissions

closed (31 December 2025)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of  
Integrated Research, Institute of Science Tokyo, Yokohama 226-8501,  
Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)  
/ CiteScore - Q2 (Artificial Intelligence)
