

Special Issue

Artificial Intelligence in Healthcare and Neural Engineering

Message from the Guest Editors

This Special Issue focuses on recent advances in neural information processing and machine learning techniques for healthcare and neural engineering. For this purpose, we invite researchers to contribute original research papers dedicated to developing advanced pattern recognition, machine learning, and computational neuroscience methods for healthcare applications, including computer-aided diagnosis and prognosis, neural system rehabilitation, brain-computer interface, and so on. Potential Topics include but are not limited to the following:

- Neuroimaging data analysis for healthcare engineering
- Multi-dimensional optimization of neural features
- Deep learning for neural information processing
- Methods and applications of brain-computer interface
- Multimodal brain imaging fusion
- Brain connectivity modeling and analysis
- Multimodal human-computer interaction
- Brain functional and structural disease diagnosis
- Neural computing-based treatment outcome prediction
- Neural systems and rehabilitation engineering

Guest Editors

Dr. Yu Zhang

Dr. Tao Zhou

Dr. Islem Rekik

Dr. Kim-Han Thung

Deadline for manuscript submissions

closed (28 February 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of
Integrated Research, Institute of Science Tokyo, Yokohama 226-8501,
Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)
/ CiteScore - Q2 (Artificial Intelligence)
