

## Special Issue

# How Is AI Transforming Education?

### Message from the Guest Editor

Developing 21st-century competences such as creativity, critical thinking, and digital literacy is a key goal of modern education. The rise of Artificial Intelligence (AI), especially generative AI (Gen-AI), offers both opportunities and challenges, reshaping how we learn, teach, and interact. This Special Issue explores how AI transforms education through pedagogically grounded applications, innovative learning designs, and studies on its cognitive, social, and ethical impacts. We welcome empirical, theoretical, and design-based works showing how AI acts not only as a tool but as a co-creator of learning—enhancing personalization, assessment, and collaboration. By integrating human-centered and pedagogical perspectives, this issue aims to build a holistic framework for responsible and effective AI-enhanced education.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of Integrated Research, Institute of Science Tokyo, Yokohama 226-8501, Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

##### Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)  
/ CiteScore - Q2 (Artificial Intelligence)
