

Special Issue

Artificial Intelligence for Network Management

Message from the Guest Editors

This Special Issue focuses on the use of AI and machine learning in network management. It is known that artificial intelligence (AI) is revolutionizing network management by enhancing efficiency, security and performance. AI-driven solutions enable automated network monitoring, predictive maintenance and proactive issue resolution. Machine learning algorithms analyze vast amounts of network data to detect anomalies, predict failures and optimize traffic flow. By continuously learning and adapting to network conditions, AI enhances the scalability and reliability of network infrastructure, ultimately leading to improved user experiences and operational efficiency. This Special Issue calls for papers on AI-powered network management that supports the growing complexity of modern networks, including cloud services, IoT devices and 5G technology.

Guest Editors

Dr. Stephen Ojo

Dr. Agbotiname Lucky Imoize

Dr. Lateef Adesola Akinyemi

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of
Integrated Research, Institute of Science Tokyo, Yokohama 226-8501,
Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)
/ CiteScore - Q2 (Artificial Intelligence)
