

Special Issue

AI in Healthcare: Methods and Applications

Message from the Guest Editors

The development of Artificial Intelligence (AI), along with its subcategories, such as deep learning and reinforcement learning, has led to significant success in various domains, including advanced image processing and pattern detection, and signal processing/recognition and its applications. The purpose of this Special Issue is to reflect the state-of-the-art development of deep understanding/interpretation for AI/ML algorithms/applications in the medical/clinical domains and define future research directions/trends toward a better interpretation of AI in the healthcare field. Topics of interest include but are not limited to:

- Explainable AI in medical/clinical practice;
- XAI in healthcare;
- Medical learning theory and applications;
- Deep learning applications in healthcare;
- Expert system;
- Knowledge-based systems.

Guest Editors

Dr. Su Yang

Department of Computer Science, Swansea University, Swansea SA1 8EN, UK

Dr. Erick Perwanto

Department of Computer Science, National University of Singapore, Singapore City, Singapore

Deadline for manuscript submissions

closed (28 February 2022)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of Integrated Research, Institute of Science Tokyo, Yokohama 226-8501, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)
/ CiteScore - Q2 (Artificial Intelligence)
