

Special Issue

Unmanned Aerial Systems (UAS)

Message from the Guest Editors

This *AI* Special Issue is seeking manuscripts that promote discovery- and application-based research, ideas, and theoretical concepts related to unmanned aerial systems (UAS). The focus of this Special Issue is on how AI computer programs and algorithms utilize UAS as intelligent machines that are capable of learning and problem solving in ways that normally require human intelligence. Manuscripts that address AI in its broadest form from machine-based learning using supervised or unsupervised methods to deep learning models should relate to research related to aerial-platform-based autonomous vehicles.

Guest Editors

Dr. Joseph Hupy

School of Aviation and Transportation Technology, Purdue Polytechnic Institute, Purdue University, West Lafayette, IN 47907, USA

Dr. Cyril Wilson

Department of Geography and Anthropology, University of Wisconsin-Eau Claire, Eau Claire, WI 54702, USA

Deadline for manuscript submissions

closed (30 August 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Kenji Suzuki

Biomedical Artificial Intelligence Research Unit (BMAI), Institute of Integrated Research, Institute of Science Tokyo, Yokohama 226-8501, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Journal Rank:

JCR - Q1 (Computer Science, Interdisciplinary Applications)
/ CiteScore - Q2 (Artificial Intelligence)
