Advances in Complex Network Models and Random Graphs

Guest Editors:

Dr. Yilun Shang

Department of Computer and Information Sciences, Northumbria University, Newcastle-upon-Tyne, UK

Dr. Yang (Felix) Lou

Graduate School of Information Science and Technology, Osaka University, Osaka 565-0871, Japan

Deadline for manuscript submissions: closed (15 August 2021)

Message from the Guest Editors

We invite you to submit your latest research in the area of complex networks and related algorithms to this Special Issue, "Advances in Complex Network Models and Random Graphs". We are looking for new and innovative complex network models and theories to analyse the real-world networked systems; as well efficient algorithms to solve and optimize the problems encounted with respect to these networked systems. High-quality papers are solicited to address both theoretical and practical issues of complex networks. Potential topics include, but are not limited to, physical and functional properties of complex networks, mathematical properties of complex network models and random graphs, nonlinear dynamical systems and collective behaviours in complex systems, network robustness enhancament controllability and and optimization, epidemiological study using complex networks, etc.

- Applications of Graph Theory
- Community detection
- Complex Networks
- Controllability
- Consensus
- Epidemiology
- Malicious attacks
- Network dynamics
- Optimization
- Random Graphs
- Robustness
- Searching in rSorks

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from guite different perspectives, having led to the development of many subcommunities: Complexity theory (limitations). approximation or parameterized algorithms (types of geometric algorithms problems). (subject area). metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases. Journal Rank: JCR - Q2 (Computer Science, Theory and Methods) / CiteScore - Q1 (Numerical Analysis)
