### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to foster discussion on the dynamics of complex systems from an algorithmic viewpoint, emphasizing the detection of relevant integrated structures or subsystems and the understanding of their relationship with the dynamics of the whole system (and its environment). The Special Issue welcomes papers that highlight relationships between algorithms applicable to such problems and methods, derived from them or being their extensions, that can be applied more widely to other fields, such as data analysis, machine learning, and pattern recognition.

Deadline for manuscript  
submissions:

**15 August 2021**

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-  
von-Guericke-University, P.O. Box  
4120, D-39016 Magdeburg,  
Germany

## Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

## Author Benefits

**Open Access** :— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility**: indexed within Scopus, ESCI (Web of Science), Ei Compindex, MathSciNet and many other databases.

**Journal Rank**: CiteScore - Q2 (*Computational Theory and Mathematics*)
