

## Statistical Disclosure Control for Microdata

Guest Editor:

**Prof. Dr. Matthias Tempel**

School of Business, University of Applied Sciences and Arts Northwestern Switzerland, 4600 Olten, Switzerland

Deadline for manuscript submissions:

**closed (30 November 2019)**

### Message from the Guest Editor

We invite you to submit your latest research in the area of statistical disclosure control and anonymization of data to this Special Issue, “Statistical Disclosure Control”. Privacy, confidentiality, and anonymization of data have recently received a great deal of attention, caused by the increased sensibility of this topic in politics and society and related new laws in privacy. Research on this topic is in special focus.

We are looking for new and innovative approaches for the anonymization of data with personal information. High-quality papers are solicited to address both theoretical and practical issues of methods in statistical disclosure control. Potential topics include, but are not limited to, re-identification risk measurement, anonymization of data, utility of anonymized data, and methods to create synthetic data. Complex case studies with complex data from health, official statistics, or any other kind of data including personal information are also welcome.

an Open Access Journal by MDPI

Germany

## Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

## Author Benefits

**Open Access** : free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility**: indexed within Scopus, ESCI (Web of Science), Ei Compindex, and other databases.

**Journal Rank**: JCR - Q2 (Computer Science, Theory and Methods) / CiteScore - Q1 (Numerical Analysis)
