

Special Issue

Novel Heuristic Algorithms: Optimization and Applications

Message from the Guest Editors

Heuristic algorithms are widely used to solve NP-hard problems in computer science. With the development of artificial intelligence in recent years, heuristic algorithms are playing an increasingly important role in artificial intelligence, engineering design, data mining, scheduling, manufacturing and transportation, etc. This Special Issue focuses on the latest development and applications of heuristic algorithms and theoretical research. Classical optimization problems such as genetic algorithms are also welcome.

About the Journal

Message from the Editor-in-Chief

Algorithms are the core of computational mathematics and computer science. The whole area has been considered from different perspectives, which has led to the development of several sub-communities. The aim is to bring together researchers and practitioners from different areas of computational mathematics and computer science and to offer a platform for interdisciplinary applications in different areas of science and technology. In this way, *Algorithms* may become a forum for the exchange of new stimulating ideas between the different sub-communities working in the area of algorithms and their applications and the presentation of high-quality novel algorithmic approaches.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University Magdeburg, P.O.
Box 4120, D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computational Mathematics)
