Algorithmic Game Theory 2021

Message from the Guest Editors

We invite you to submit high-quality papers to this Special Issue on “Algorithmic Game Theory”. Areas of interest include, but are not limited to, the following:

- Equilibrium computation;
- Dynamics in games;
- Algorithmic mechanism design;
- Market design and matching markets;
- Computational social choice;
- Bayesian persuasion and information structure design;
- Algorithmic fairness;
- Social networks, information cascades, and network diffusion;
- Game theoretical models for privacy and security;
- Learning in games and multi-agent learning.

About the Journal

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.
