

Special Issue

Graph Partitioning: Theory, Engineering, and Applications

Message from the Guest Editors

We invite you to submit your latest research in the area of graph partitioning to this Special Issue, Graph Partitioning: Theory, Engineering, and Applications. All facets of graph partitioning will be considered, including shared-memory parallel and distributed algorithms, streaming algorithms, exact algorithms, approximation algorithms, local search, genetic algorithms, metaheuristics, hardness results, parameterized algorithms, variations in objective functions, and alternate partitioning primitives (such as edge partitioning) or process mapping algorithms. High-quality papers are solicited to address both the theoretical and practical issues of graph partitioning. Submissions on graph partitioning's impact on existing applications, and the introduction of new applications with experiments are highly encouraged.

Guest Editors

Dr. Christian Schulz

Faculty of Computer Science, Research Group Theory and Applications of Algorithms, University of Vienna, 1010 Vienna, Austria

Dr. Darren Strash

About the Journal

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University, P.O. Box 4120,
D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Numerical Analysis)
