

Special Issue

Machine-Learning in Computer Vision Applications

Message from the Guest Editors

Machine learning is a study of computer algorithms that automatically learn and improve from experience without being explicitly programmed. It is a branch of Artificial Intelligence (AI). Machine learning algorithms are used in a range of disciplines including: computer vision, medical diagnosis, and robot control. This Special Issue features a balance between state-of-the-art research and practical applications within the scope of machine learning and computer vision. We invite you to submit your latest research to this Special Issue, “Machine-learning in computer vision applications”. This Special Issue provides a forum for researchers and practitioners to review and disseminate quality research work and discuss critical issues for further development.

Guest Editors

Dr. Puneet Sharma

Department of Automation and Process Engineering, UiT-The Arctic University of Norway, Tromsø, Norway

Prof. Dr. Fridolin Wild

Institute of Educational Technology, The Open University, Milton Keynes, UK

About the Journal

Message from the Editor-in-Chief

Algorithms are the core of computational mathematics and computer science. The whole area has been considered from different perspectives, which has led to the development of several sub-communities. The aim is to bring together researchers and practitioners from different areas of computational mathematics and computer science and to offer a platform for interdisciplinary applications in different areas of science and technology. In this way, *Algorithms* may become a forum for the exchange of new stimulating ideas between the different sub-communities working in the area of algorithms and their applications and the presentation of high-quality novel algorithmic approaches.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University Magdeburg, P.O.
Box 4120, D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Computational Mathematics)
