

Special Issue

Algorithms for Communication Networks

Message from the Guest Editors

Communication networks are being used very widely, and they are becoming even more ubiquitous as they evolve to connect not only people, but also a multitude of non-human actors, such as computers, sensors, actuators, various machines, vehicles, appliances, and many others: a practically infinite number of *things*. This trend clearly points to networks that can grow extremely large and complicated. As a consequence, efficient and scalable algorithms to support the network operation are becoming even more important than as they already are today. This Special Issue is devoted to algorithms and protocols that support the operation or design of large networks and/or motivated by networking issues.

Guest Editors

Prof. Dr. Andras Farago
Dr. Ionut Brandusoiu
Dr. Héctor Migallón

About the Journal

Message from the Editor-in-Chief

Algorithms are the core of computational mathematics and computer science. The whole area has been considered from different perspectives, which has led to the development of several sub-communities. The aim is to bring together researchers and practitioners from different areas of computational mathematics and computer science and to offer a platform for interdisciplinary applications in different areas of science and technology. In this way, *Algorithms* may become a forum for the exchange of new stimulating ideas between the different sub-communities working in the area of algorithms and their applications and the presentation of high-quality novel algorithmic approaches.

Editor-in-Chief

Prof. Dr. Frank Werner

Faculty of Mathematics, Otto-von-Guericke-University Magdeburg, P.O.
Box 4120, D-39016 Magdeburg, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Numerical Analysis)
