Special Issue

Algorithms in Data Classification

Message from the Guest Editor

It is my pleasure to invite you to submit your valuable work to this Special Issue on "Algorithms and Data Classification" of the reputable MDPI journal *Algorithms*. The aim of this Special Issue is to present recent advances in the area of Data Classification as well as to provide applications in real-world problems. Topics include but are not limited to:

- Binary classification
- Multi-class classification
- Big Data Classification
- Text Classification
- Multimedia Classification
- Uncertain Data Classification

Guest Editor

Prof. Dr. Ioannis Tsoulos

About the Journal

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Editor-in-Chief

Prof. Dr. Frank Werner
Faculty of Mathematics, Otto-von-Guericke-University, P.O. Box 4120, D-39016 Magdeburg, Germany

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Theory and Methods) / CiteScore - Q1 (Numerical Analysis)
