

## Special Issue

# Swarm Intelligence for Operations and Supply Chain Management

### Message from the Guest Editor

This Special Issue of *Algorithms* focuses on recent developments of swarm optimization and its many applications in operations and supply chain management. Swarm intelligence is an important research area of artificial intelligence and operations research that provides adaptive computational tools to solve complex optimization and decision problems. Swarm intelligence and evolutionary computation showed, during the last few decades, a high flexibility in terms of handling variables, constraints, and multiple conflicting objectives. This Special Issue serves as a forum for the development of advanced swarm intelligent algorithms and/or applying existing ones for solving operations management and decision problems. A special interest will be oriented towards non-conventional problems, such as game optimization, dynamic optimization, multi-level and multi-objective optimization.

## About the Journal

### Message from the Editor-in-Chief

*Algorithms* are the core of computational mathematics and computer science. The whole area has been considered from different perspectives, which has led to the development of several sub-communities. The aim is to bring together researchers and practitioners from different areas of computational mathematics and computer science and to offer a platform for interdisciplinary applications in different areas of science and technology. In this way, *Algorithms* may become a forum for the exchange of new stimulating ideas between the different sub-communities working in the area of algorithms and their applications and the presentation of high-quality novel algorithmic approaches.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /  
CiteScore - Q1 (Numerical Analysis)
