

Special Issue

Selected Papers from the 2022 Summer Conference on Applied Data Science (SCADS)

Message from the Guest Editor

The papers in this Special Issue are derived from work conducted at the inaugural Summer Conference on Applied Data Science (SCADS) hosted by the Laboratory for Analytic Sciences (LAS) at North Carolina State University (NCSU) in Raleigh, NC, during the summer of 2022. This 8-week, in-person workshop brought data science expertise together from academia, industry, and government to address a "Grand Challenge" problem of interest to the broad community of knowledge workers in the Intelligence Community (IC) and beyond. Roughly 40 university professors, students, industry professionals, and government researchers participated. Beyond the Grand Challenge, SCADS provided a hands-on learning opportunity for every participant and served to develop collaborative partnerships spanning affiliations. The inspiration for SCADS stemmed from recommendations made in high-level documents from the National Security Commission on AI (NSCAI) and from the Center for Strategic and International Studies (CSIS), among others.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 27.4 days after submission; acceptance to publication is undertaken in 7.7 days (median values for papers published in this journal in the first half of 2025).
