Special Issue

Advances in Applied Data Science: Bridging Theory and Practice

Message from the Guest Editor

The second annual Summer Conference on Applied Data Science (SCADS), hosted by the Laboratory for Analytic Sciences (LAS) at North Carolina State University (NCSU) in 2023, was organized around this theme. Expanding on the insights generated at this event, this Special Issue addresses the challenge of managing the vast amount of information available to knowledge workers across several layers of the information ecosystem, and the potential for recent innovations in machine learning, multimodal analytics (combining text, audio, imagery, sensor data, etc.), recommendation systems, data triage, LLMs, and human–machine collaborative systems to advance the state of the art in this emerging area. To that end, this Special Issue is an open call for advances in theoretical models, novel methodologies, and case studies of practical applications of personalized analytics, with the ultimate goal of encouraging breakthrough innovation in tailored reporting for knowledge workers across all data-driven domains.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carson K. Leung
Department of Computer Science, University of Manitoba, Winnipeg,
MB R3T 2N2, Canada

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:
indexed within Scopus and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 27.4 days after
submission; acceptance to publication is undertaken in 7.7
days (median values for papers published in this journal in
the first half of 2025).
