

Special Issue

Reviews on Data Analytics and Its Applications

Message from the Guest Editor

The field of data analytics is evolving rapidly, with continuous advancements in methodologies, technologies, and applications. To provide a comprehensive overview of the latest developments in the field, *Analytics* is launching a Special Issue dedicated to high-quality review papers that consolidate knowledge, analyze trends, and identify future directions in data analytics science, engineering, and projects. This Special Issue welcomes the submission of systematic reviews, meta-analyses, and state-of-the-art surveys that address topics including, but not limited to, machine learning foundations, big data analytics, information integration, quality metrics, AI-driven analytics, and emerging technologies such as quantum computing and AI hardware. We also encourage the contribution of reviews on engineering frameworks, standards, and methodologies related to data analytics, as well as sector-specific applications in healthcare, finance, cybersecurity, and smart cities. We welcome contributions that offer critical insights, comparative analyses, and future research perspectives, helping to shape the next generation of data analytics innovations.

Guest Editor

Prof. Dr. Carson K. Leung
