

Special Issue

Anatomy for Modern Urology

Message from the Guest Editor

Technological innovations and molecular discoveries change the basement of medicine and interventional practices in urology and open a new era. The field of urology deals with diseases of the urinary system and genital male organs, requiring multidisciplinary approaches. These new insights also move the field of morphological sciences to adapt anatomical knowledge and morphological models to the innovations and facilitate their translation in practice. The more recent aspects of gross and microscopic anatomy in urology which require comprehensive morphological knowledge for practice or biological research are delivered in this Special Issue. The new approaches using information technology and virtual anatomy to reduce the learning curve in interventional radiology and surgery to treat urological diseases are also mentioned. This Special Issue seeks reviews and original papers covering a wide range of hot topics related to new studies around clinical and radiological anatomy, uropathology, the functional and molecular aspects of aging, and diseases in the field of urology. New teaching approaches and research methodologies for urological sciences are also welcome.

Guest Editor

Prof. Dr. Olivier Cussenot

Department of Urology and Clinical Research Group on Predictive Onco-Urology, Sorbonne University, 75013 Paris, France

Deadline for manuscript submissions

closed (15 December 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Francesco Fornai

Department of Translational Research and New Technologies in
Medicine and Surgery, University of Pisa, 56124 Pisa, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
