Research Group, Hungarian  
Research Network, University of  
Szeged (HUN-REN-SZTE), Szeged,  
Hungary

Deadline for manuscript  
submissions:

**31 July 2024**

### **Message from the Guest Editor**

This Special Issue will provide a platform for researchers to share their latest findings and contribute to the advancement of pain management in anesthesia practice. The published papers will have the potential to inform clinical practice, improve patient care, and inspire further research in this important area. This Special Issue highlights the most recent advances in experimental, clinical, and translational research in the fields of anesthesia research, focusing on novel targets for pain management. We welcome submissions from researchers and practitioners in the field of anesthesia research and look forward to receiving your papers focusing on (but not limited to) the following:

- Etiology, pathogenesis, and progression mechanisms;
- Early diagnosis including biomarkers, bio-imaging, and biosensors;
- Prophylactic, disease-modifying and therapeutic strategies, novel targets;
- Novel drug discovery and development, naturally driven biomedicines, natural bioactive molecules, and vaccines;
- Preclinical in vitro models and animal models;
- Bench-to-bedside translational research;
- Bedside-to-bench translational research.
