

Special Issue

Pioneering the Path to Pain Management: Discovering Unexplored Analgesic Targets in Anesthesia Research

Message from the Guest Editor

This Special Issue will provide a platform for researchers to share their latest findings and contribute to the advancement of pain management in anesthesia practice. The published papers will have the potential to inform clinical practice, improve patient care, and inspire further research in this important area. This Special Issue highlights the most recent advances in experimental, clinical, and translational research in the fields of anesthesia research, focusing on novel targets for pain management. We welcome submissions from researchers and practitioners in the field of anesthesia research and look forward to receiving your papers focusing on (but not limited to) the following:

- Etiology, pathogenesis, and progression mechanisms;
- Early diagnosis including biomarkers, bio-imaging, and biosensors;
- Prophylactic, disease-modifying and therapeutic strategies, novel targets;
- Novel drug discovery and development, naturally driven biomedicines, natural bioactive molecules, and vaccines;
- Preclinical in vitro models and animal models;
- Bench-to-bedside translational research;
- Bedside-to-bench translational research.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Marco Ranucci

Department of Cardiovascular Anesthesia and ICU, IRCCS Policlinico
San Donato, Milan, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

first decisions in 19 days; acceptance to publication in 4 days (median values for MDPI journals in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
