

Special Issue

Pioneering the Path to Pain Management: Discovering Unexplored Analgesic Targets in Anesthesia Research

Message from the Guest Editor

This Special Issue will provide a platform for researchers to share their latest findings and contribute to the advancement of pain management in anesthesia practice. The published papers will have the potential to inform clinical practice, improve patient care, and inspire further research in this important area. This Special Issue highlights the most recent advances in experimental, clinical, and translational research in the fields of anesthesia research, focusing on novel targets for pain management. We welcome submissions from researchers and practitioners in the field of anesthesia research and look forward to receiving your papers focusing on (but not limited to) the following:

- Etiology, pathogenesis, and progression mechanisms;
- Early diagnosis including biomarkers, bio-imaging, and biosensors;
- Prophylactic, disease-modifying and therapeutic strategies, novel targets;
- Novel drug discovery and development, naturally driven biomedicines, natural bioactive molecules, and vaccines;
- Preclinical in vitro models and animal models;
- Bench-to-bedside translational research;
- Bedside-to-bench translational research.

USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 15.7 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
