Message from the Guest Editor

Dear Colleagues,

The combination of anthropological, archaeological, biological, ecological, and paleontological research focused on animal remains is a defining characteristic of the zooarchaeology. Zooarchaeological interpretations are based on the premise that there is a systemic relationship between humans and their environment, especially between humans and other animal populations, and that many cultural and biological aspects of this relationship are reflected in the archaeological record.

This Special Issue aims to present the most recent advances in the knowledge of the long-standing and complex relationships between past peoples and animals, focusing on themes ranging from taphonomy, paleoenvironmental reconstruction, human-subsistence economies, and the roles that animals played in human cultures. Papers related to palaeopathological conditions and taphonomic processes affecting zooarchaeological assemblages are also welcome.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
