### Message from the Guest Editors

*Salmonella* and *Campylobacter* are usually present in the intestinal tract of many wild and domestic animals, including poultry. *Salmonella* and *Campylobacter* cause human gastroenteritis, and poultry is considered a major reservoir and transmission source to humans worldwide. Though several control measures are in place, controlling *Salmonella* and *Campylobacter* in the poultry industry is challenging. In addition to existing good manufacturing practices, it is proposed that reducing the colonization of these foodborne pathogens using intervention methods in preharvest/preslaughter and/or postharvest stages, in addition to existing good manufacturing practices, can translate into a reduced number of human outbreaks and infections.

This Special Issue aims to provide articles that showcase the current issues and the research addressed by the title, “Intervention Strategies to Control Foodborne Pathogens in Poultry”.

Deadline for manuscript submissions:

**closed (25 April 2025)**

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia  
2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in ‘Agriculture, Dairy & Animal Science’; 21/170 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
