Message from the Guest Editor

Dear Colleagues,

Camera trapping is used extensively around the world for survey, monitoring, and management-related activities relating to wildlife. As the technology improves so too does the rate at which raw data are collected. This presents some interesting logistical and technical challenges for researchers as they return from the field and attempt to make sense of pattern in their datasets. This Special Issue of *Animals* will explore some of the major emerging themes in the field of modern-day camera trapping, including (i) innovative ways in which the technology is being used in a field situation; (ii) the various ways in which camera traps can be optimally set in the field to collect data; (iii) the use of automated intelligence in identifying wildlife species from image files, and; (iv) the role of citizen science in assisting interpretation of images.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
