Impact of Environment and Stressors on Animal Welfare

Message from the Guest Editor

Animals experience varying degrees of environmental and psychological stressors throughout their lives. Although, some of these stimuli are essential for life, others can become too demanding, the animal struggles to cope, thus negatively affecting growth, reproduction, performance, productivity, or health. It is not possible to generalize the biological consequences of the impact of stress, but animals cannot be in a state of good welfare if environmental or psychological challenges disrupt either its mental or its physiological state.

We invite original research papers that address the impact of environmental factors or stressors on animal behavior, growth, reproduction, productivity, health, and welfare in the short- and long-term and propose strategies to minimize the negative impacts of agricultural practices.

Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal welfare, animal ethics and animal science. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science and received a first Impact Factor of 1.654. The journal ranks 13/60 (Q1) in the category ‘Agriculture, Dairy & Animal Science’ and 29/140 (Q1) in ‘Veterinary Sciences.’

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science) from Vol. 5 (2015), Zoological Record (Web of Science), Scopus and other databases. Citations available in PubMed, full-text archived in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2018).
