Gut Microbiota and Growth and Health of Monogastric Farm Animals

Message from the Collection Editors

Dear Colleagues,

Studies on human and mice microbiota have evidenced the relevance of a well-balanced and rapidly established microbiota community in the gut for the host health and well-being. The settlement of the gut microbiota in monogastric farm animals is a complex succession of events denoted by a longitudinal progression in time (birth to adult) and space (proximal to distal).

We invite original research papers that address improved methods for the study of the gut microbiota of monogastric farm animals, its progression during host life, and its adaptation to different segments of the digestive tracts. Also of interest are studies that introduce and test new methods to positively and rapidly manipulate the gut microbiota, assess its association with the efficiency of use of the diet by the animal and the impact on animal health and well-being, and unravel the mechanistic effects, including those related to the development of mucosa-associated lymphoid tissue. Additional topics may include the effect of breed, genetic lines, and individuals on the gut microbiota of monogastric farm animals, the development of more tailored and precise farming practices for animals.

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in ‘Agriculture, Dairy & Animal Science’; 16/167 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.0.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
