### Message from the Guest Editors

Dear Colleagues,

Knowledge of feeding/nutritional requirements are pivotal keys in development and growth of cultured fishes, which largely rely on the capture, digestion and assimilation of adequate feed. Larviculture of fishes has largely improved in recent years but there is still the need of rearing optimization by developing new feeding procedures and identifying new and sustainable feed ingredients.

The approach for this Special Issue is particularly focused on commonly reared finfish species, ornamentals and species used as biological models. The topics of interest include but are not limited to feeding improvement, new feeding strategies, novel and sustainable ingredients and dietary sources for aquafeed production, microdiet technology, broodstock nutrition for larval condition improvement, prebiotics and probiotics, traceability, stress response, and welfare.

Dr. Miquel Planas Oliver

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
