Message from the Guest Editor

Dear Colleagues,

Wild boar populations have traditionally been exposed to intensive hunting pressure, habitat loss, and other human activities. However, during recent decades, conservation efforts and social and environmental factors have increased their range, currently including the urban environment, and the abundance of wild boar populations, leading to a series of management and conservation challenges. These challenges have been exacerbated by the fast spread of African swine fever around the world. With wild boar playing a major role in the transmission of ASF among countries, the disease has a devastating economic and social impact. The effective management of wild boar populations requires an integrated approach that considers both ecological and socio-economic factors in local contexts. Further research is needed to better understand how different management approaches affect wild boar populations in different contexts, as well as their interactions with pathogens and other species. This Special Issue covers topics such as population dynamics, spatial behavior, habitat use, management, epidemiology, hunting regulations, and human wildlife interactions and conflicts.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
