Message from the Guest Editor

This Special Issue will explore how feed additives influence the health and productivity of animals like pigs, chickens, and horses, focusing on nutrient absorption, immune function, and overall well-being. The aim of this Special Issue is to gather a collection of insightful research articles and reviews that align with our journal's focus on animal nutrition and veterinary science. We aim to curate at least 10 high-quality papers that could lead to advancements in feed strategies and animal care, with potential publication in book form.
